Brian Rice, President, California Professional Firefighters on Trump's threat to withhold aid: "The federal government that has chosen to divert resources away from forest management, not California. Natural disasters are not "red" or "blue" – they destroy regardless of party."

and threatening to withhold aid to the victims of the cataclysmic fires is ill-informed, ill-timed and demeaning to those who are suffering as well as the men and women on the front lines.

"At a time when our every effort should be focused on vanquishing the destructive fires and helping the victims, the president has chosen instead to issue an uninformed political threat aimed squarely at the innocent victims of these cataclysmic fires.

"At this moment, thousands of our brother and sister firefighters are putting their lives on the line to protect the lives and property of thousands. Some of them are doing so even as their own homes lay in ruins. In my view, this shameful attack on California is an attack on all our

management policies are to blame for catastrophic wildfire is dangerously wrong. Wildfires are sparked and spread not only in forested areas but in populated areas and open fields fueled by parched vegetation, high winds, low humidity and geography. Moreover, nearly 60 percent of California forests are under federal management, and another two-thirds under private control. It is the federal government that has chosen to divert resources away from forest management, not California.

"Natural disasters are not "red" or "blue" – they destroy regardless of party. Right now, families are in mourning, thousands have lost homes, and a quarter-million Americans have been forced to flee. At this desperate time, we would encourage the president to offer support in word and deed,

Donald J. Trump @realDonaldTrump

There is no reason for these massive, deadly and costly forest fires in California except that forest management is so poor. Billions of dollars are given each year, with so many lives lost, all because of gross mismanagement of the forests. Remedy now, or no more Fed payments!

On Tucker Carlson, two things.

1. Stop accepting the narrative that his wife was so terrified or being terrorized. That's based on his characterization & you would be pressed to find anyone better known for hyperbole. Calling the police doesn't mean she was scared.

2. People saying, let's come to your house and protest outside, that's a false equivalence. I'm not a public figure who express controversial political opinions. Being subject to non-violent protest is part of what you accept when you choose to do that.
